

CERTIFICATE CONCERNING DESIGN AND CONSTRUCTION OF ELECTRONIC SPEED MEASURING DEVICES IRLJ RULE 6.6 EFFECTIVE 1/3/2006

Received

MAY 21 2018

Whitman County Sheriff

I, Anthony W Prince, do certify under penalty of perjury as follows:

I am employed with DAY WIRELESS SYSTEMS, an authorized MPH Industries and Kustom Signals Speed Measuring Device (SMD) Service Center, as a Calibration Technician since August 2015. Part of my duties includes supervising the maintenance and repair of all electronic and laser speed measuring devices (SMD's).

The Whitman Co Sheriff's Office currently uses the following SMD:

<u>Manufacturer:</u>	<u>Model</u>	<u>Serial Number</u>
MPH	PYTHON III	PYT846002254
	35 MPH Tuning Fork	960009
	65 MPH Tuning Fork	960084
	Antenna	PYT855002673/PYT855002672

I have the following qualifications with respect to the above stated SMD:

Fourteen years of combined experience maintaining and repairing radio frequency communications and electronic devices. Five years US Marine Corps – Ground communication systems repair. Three years at McIntosh Communications as a field service technician. Over one year with Robinson Nevada Mining Company as their sole Communications technician. Five years with Day Wireless as a Journeyman Technician. I have an FCC GROL (General Radio Operator's License) with Ship Radar Endorsement (PG00048828).

Our company maintains manuals for the above stated SMD. I am personally familiar with those manuals and how the SMD is designed and operated. All initial testing of the SMD was performed under my direction. The unit was evaluated to meet or exceed existing performance standards.

Our company maintains a testing and certification program of this SMD. The Doppler program specifies: test procedures consisting of utilizing precision test equipment to simulate various speeds to verify accuracy. In moving mode; two signals are applied simultaneously, separated through attenuation. Measurements are taken of; transmit frequency, receiver sensitivity and any accompanying tuning forks. Operational functions are tested.

This SMD listed above was tested and calibrated for accuracy on MAY 1, 2018.

The calibration for accuracy is valid for up to three years from the date of testing in accordance with the National Highway Traffic Safety Administration recommendations for radar certifications.

Day Wireless Systems does hereby certify the above listed SMD meets manufacturer's published specifications and has been calibrated using standards whose accuracy's are traceable to the National Institute of Standards and Technology.

Based upon my education, training, experience and knowledge of the SMD listed above, it is my opinion that each of these pieces of equipment is so designed and constructed as to accurately employ the Doppler effect in such a way that it will give accurate measurements of the speed of motor vehicles when properly calibrated and operated by trained personnel.

**Certificate Concerning Design and Construction of Electronic Speed Measuring Devices
IRLJ Rule 6.6**

COPY

I, Dusty Fambrough, do certify under penalty of perjury as follows:

I am employed with MPH Industries as a Service Technician, a position I have held for 4 year's with numerous years experience as a Technician.

Part of my duties includes overseeing the certification and calibration of speed measuring devices (SMD's).

The radar model being calibrated: BEE III

The serial number(s) of its display/counting unit(s): CU: 122200204 Display: 664015984

The serial number(s) of its antenna(s): F: 653037532 R: 653037533

I have the following qualifications with respect to the above stated SMD.

I am a Service Technician with MPH Industries, Inc. I have received an Associate's Degree in Computer Engineering from ITT Technical College. My responsibilities at MPH include the maintenance, calibration and repair of SMD's. I have many years experience with electronics and have been in service for MPH for one year.

Our company maintains records for all of the above state SMD's. I am personally familiar with those manuals and how each of SMD's are designed and operated. All initial testing of the SMD's was conducted under my directions. The units were evaluated to meet or exceed existing performance standards. Our company maintains a testing and certification program of these SMD's. The SMD listed above was tested and calibrated for accuracy with tractability to the National Institute of Standards and Technology (formerly National Bureau of Standards). If tuning forks accompanied the SMD, they also were certified as accurate.

Based upon my education, training, experience and my knowledge of the SMD's listed above, it is my opinion that each of these pieces of equipment is so designed and constructed as to accurately employ the Doppler effects such that it will give accurate measurements of the speed of motor vehicles when properly calibrated and operated by trained personnel.

MPH Industries does hereby certify the above listed radar unit meets manufacturer's published specifications and has been calibrated using standards whose accuracy's are traceable to the National Institute of Standards and Technology.
