DECATUR ELECTRONICS, INC

3433 E Wood St. Phoenix, AZ 85040 • 1.800.428.4315

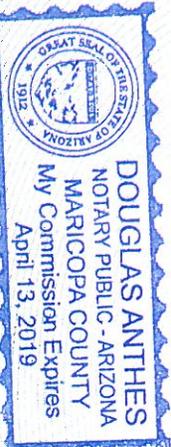

I hereby certify the following Speed Measuring Radar Device has been checked for accuracy and correctness of operation under my supervision. This Speed Measuring Radar Device is certified accurate within +/- 1mph (+/- 1kph) in moving mode, using equipment with accuracy traceable to National Institute of Standards and Technology. The transmitter frequency of this Speed Measuring Radar Device has been tested and found to be within the prescribed limits as established by the Federal Communications Commission, NHTSA, and IACP.

Model GH-D

Model Serial Number GHD-18832

Transmitter Frequency 24.172 GHz

Date: 02/04/16

TUNING FORK CERTIFICATE OF
ACCURACY

I hereby certify that Tuning Fork Serial # 279379
has been tested and found to oscillate at 5589 +/- 5 Hz at 70
degrees F. It will cause a Doppler traffic radar transmitting
at 24.150 GHz to display 77.6 MPH.

Test equipment used by Decatur Electronics, Inc. for
calibration has accuracy traceable to the National Institute
of Standards and Technology.

Quality Technician

Signature of Notary Public
State of Arizona, County of Maricopa

Signature of Notary Public
State of Arizona, County of Maricopa

Certificate Concerning Design and Construction of Electronic Speed Measuring Devices
IRLJ Rule 6.6

COPY

I, Dusty Fambrough, do certify under penalty of perjury as follows:

I am employed with MPH Industries as a Production Technician, a position I have held for 1 year.

Part of my duties includes overseeing the certification and calibration of speed measuring devices (SMD's).

The radar model being calibrated: BEE III

The serial number(s) of its display/counting unit(s): CPU: 109005840 Display: 664013184

The serial number(s) of its antenna(s): F: 653031389 R: 653031390

I have the following qualifications with respect to the above stated SMD.

I am a Production Technician with MPH Industries, Inc. I have received an Associate's Degree in Computer Engineering from ITT Technical Institute. My responsibilities at MPH include the maintenance, calibration and repair of SMD's. I have one year experience with electronics at MPH.

Our company maintains records for all of the above state SMD's. I am personally familiar with those manuals and how each of SMD's are designed and operated. All initial testing of the SMD's was conducted under my directions. The units were evaluated to meet or exceed existing performance standards. Our company maintains a testing and certification program of these SMD's. The SMD listed above was tested and calibrated for accuracy with traceability to the National Institute of Standards and Technology (formerly National Bureau of Standards). If tuning forks accompanied the SMD, they also were certified as accurate.

Based upon my education, training, experience and my knowledge of the SMD's listed above, it is my opinion that each of these pieces of equipment is so designed and constructed as to accurately employ the Doppler effects such that it will give accurate measurements of the speed of motor vehicles when properly calibrated and operated by trained personnel.

MPH Industries does hereby certify the above listed radar unit meets manufacturer's published specifications and has been calibrated using standards whose accuracy's are traceable to the National Institute of Standards and Technology.
